

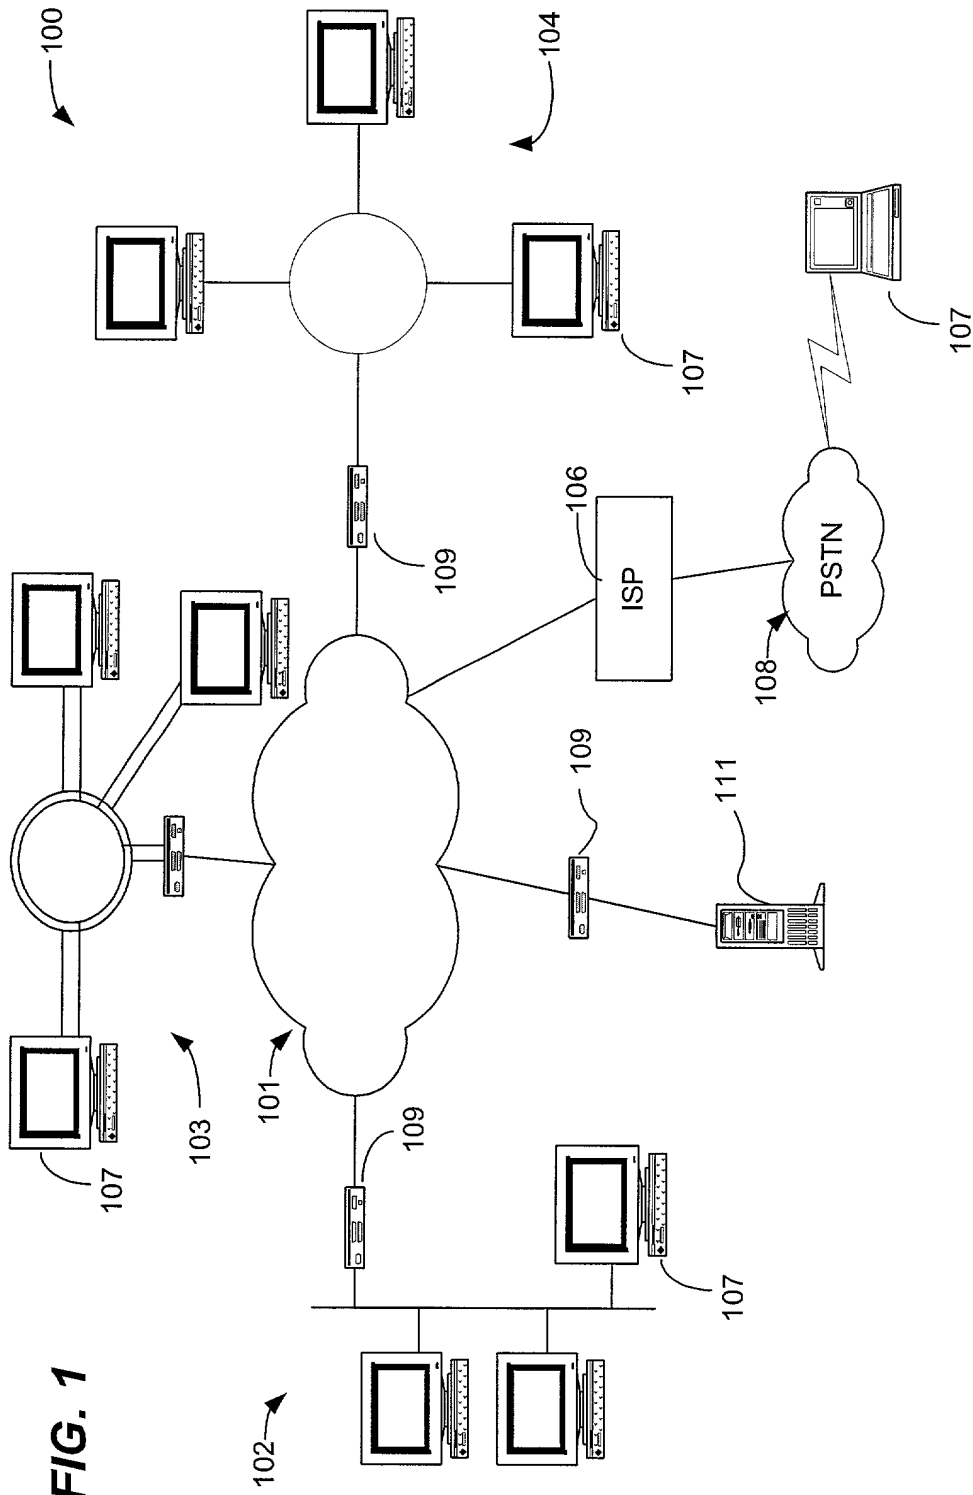

FIG. 1 is a block diagram of a network system 100. The network system 100 includes a central cloud 101 connected to various components. On the left, a group of desktop computers 107 is connected to a local hub 103, which is then connected to the cloud 101. On the right, another group of desktop computers 107 is connected to a local hub 104, which is also connected to the cloud 101. The cloud 101 is connected to an Internet Service Provider (ISP) 106, which in turn connects to a Public Switched Telephone Network (PSTN) 108. A mobile phone 107 is shown connected to the PSTN 108. Additionally, a server 111 is connected to the cloud 101 via a network interface 109. The entire system is labeled 100.
